

*Proceedings
of the International Union of Medical
and Applied Bioelectrography*

N° 1, 2026

Dear friends,

After successful Congress “Science, Information, Spirit”, dedicated to the 30th anniversary of the GDV development and 10 years of Bio-Well, we have decided to launch a new journal, "Proceedings of the IUMAB." In this journal, we plan to publish research findings obtained using the Bio-Well device—work that may not yet be ready for submission to peer-reviewed journals.

(Furthermore, publishing in peer-reviewed journals often requires significant financial resources.) This could include, for example, interesting individual patient case studies, recordings of meditative states, analyses of water or environmental samples, and other such results. We will carefully review all submissions and, after any necessary revisions, publish them in the journal.

This first issue contains pdf files of the presentations from the Congress.

We invite you to submit your work. Manuscripts in any language are welcome.

Editor-in-Chief: Professor Konstantin Korotkov.

Please send your materials to the editorial secretary,

Irina Sokolova. irina@bio-well.com.
