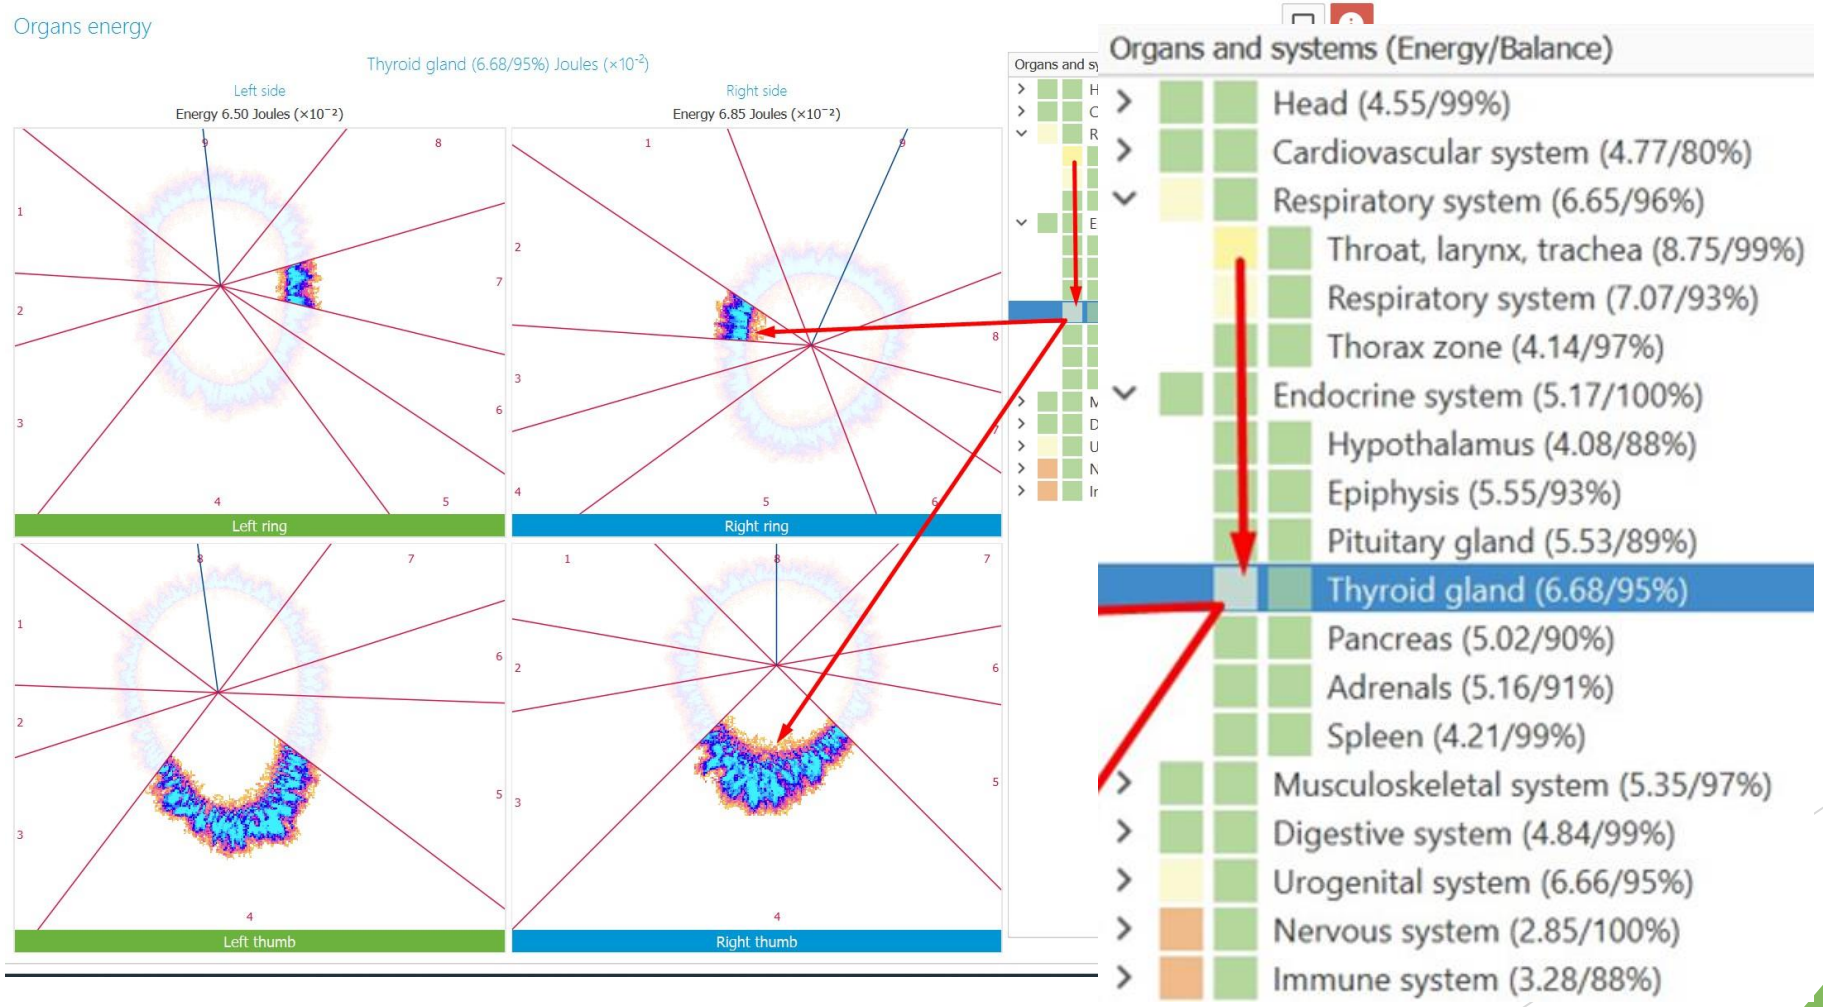
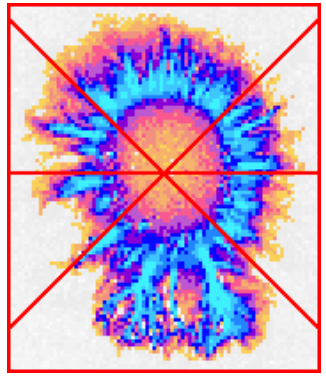
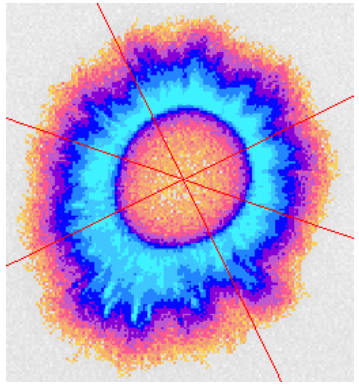
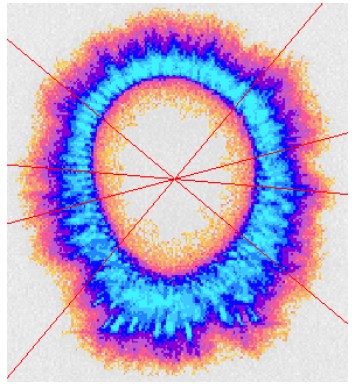
Organs energy

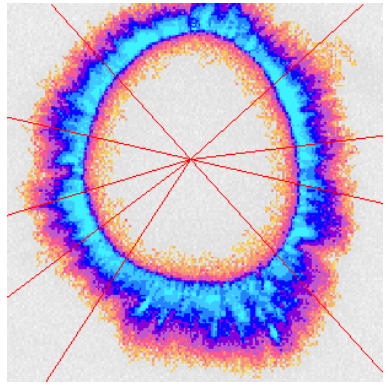


Acute process





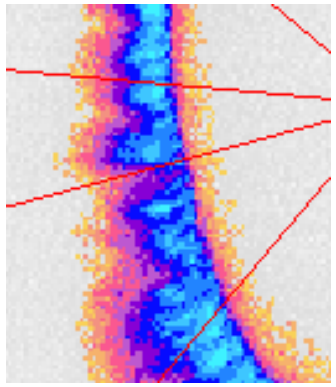




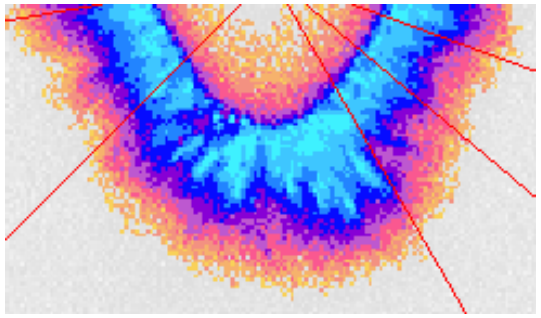
Femme.
72 ans.
1R и 5R
Bronchitis.

Femme.
83 ans.
4R
Cystitis.

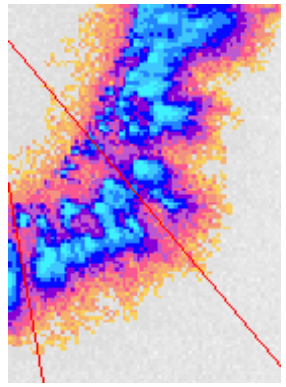
Chronic process in remission.



Femme.
72 ans.
1R
Teeth, right side.

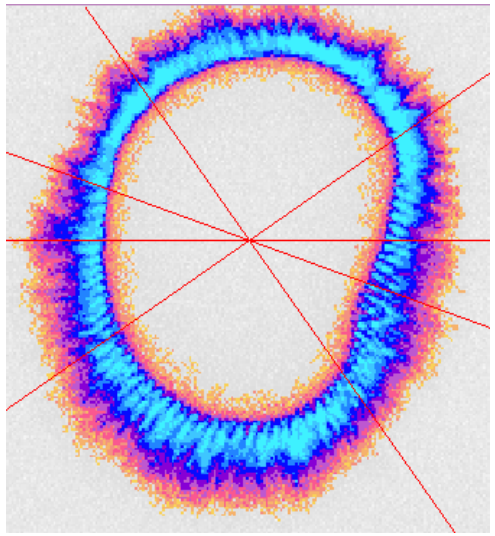


Femme.
42 ans.
4L
The genitourinary system.

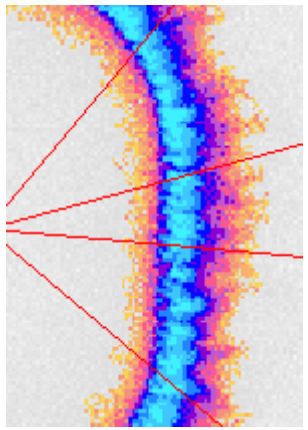


Homme.
65 ans.
3R
The right kidney.

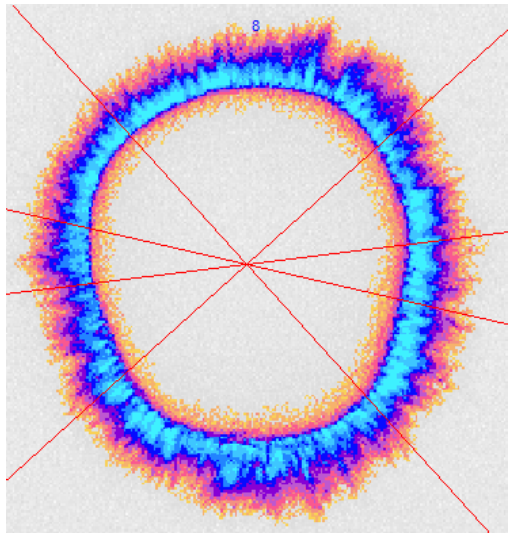
Weakness of the body(of the organism) probably in the incubation period: time between infection and the onset of signs and/ or symptoms.



Predisposition to chronic diseases.

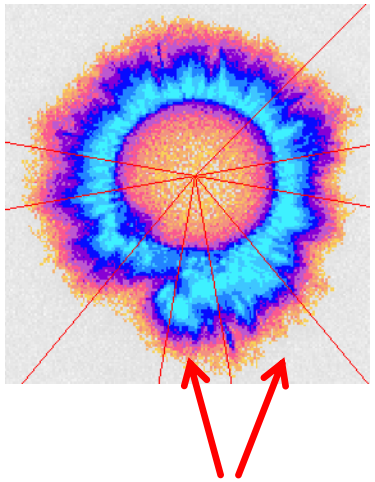


The depletion of specific organs or systems due to lifestyle.

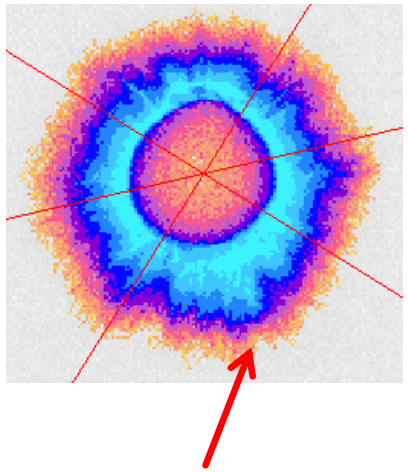


General exhaustion or weakness.

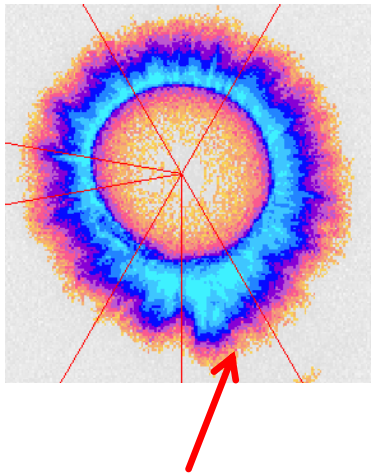
Excess energy on an organ.



2R
Sacrum, coccyx



5L
Respiratory system

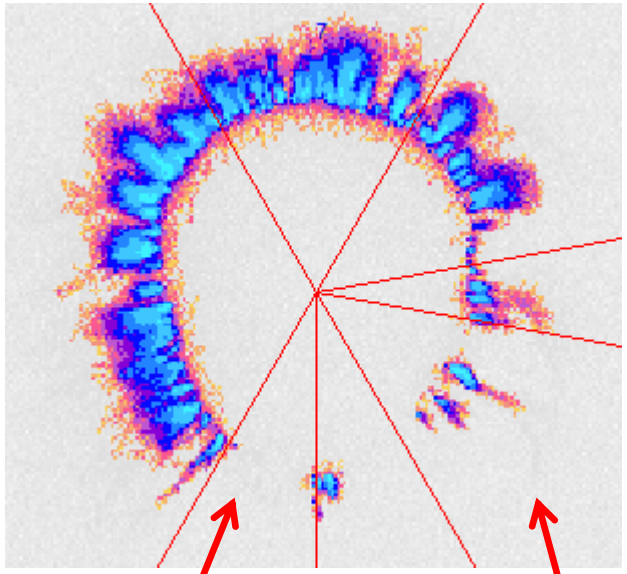


3R
The right kidney

Homme. 62 ans.
Incompetent weight lifting.

Femme. 64 ans.
Asthma. Taking strong medications.

Blockage of organic functions.

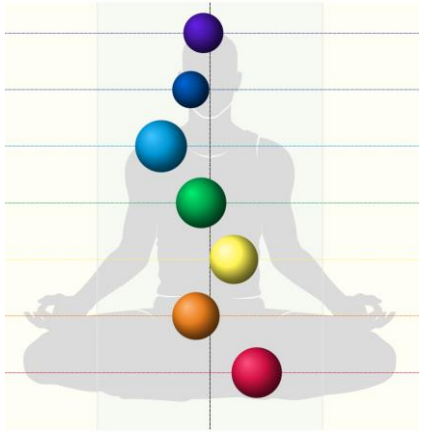


Complete blockage of the function of an organ

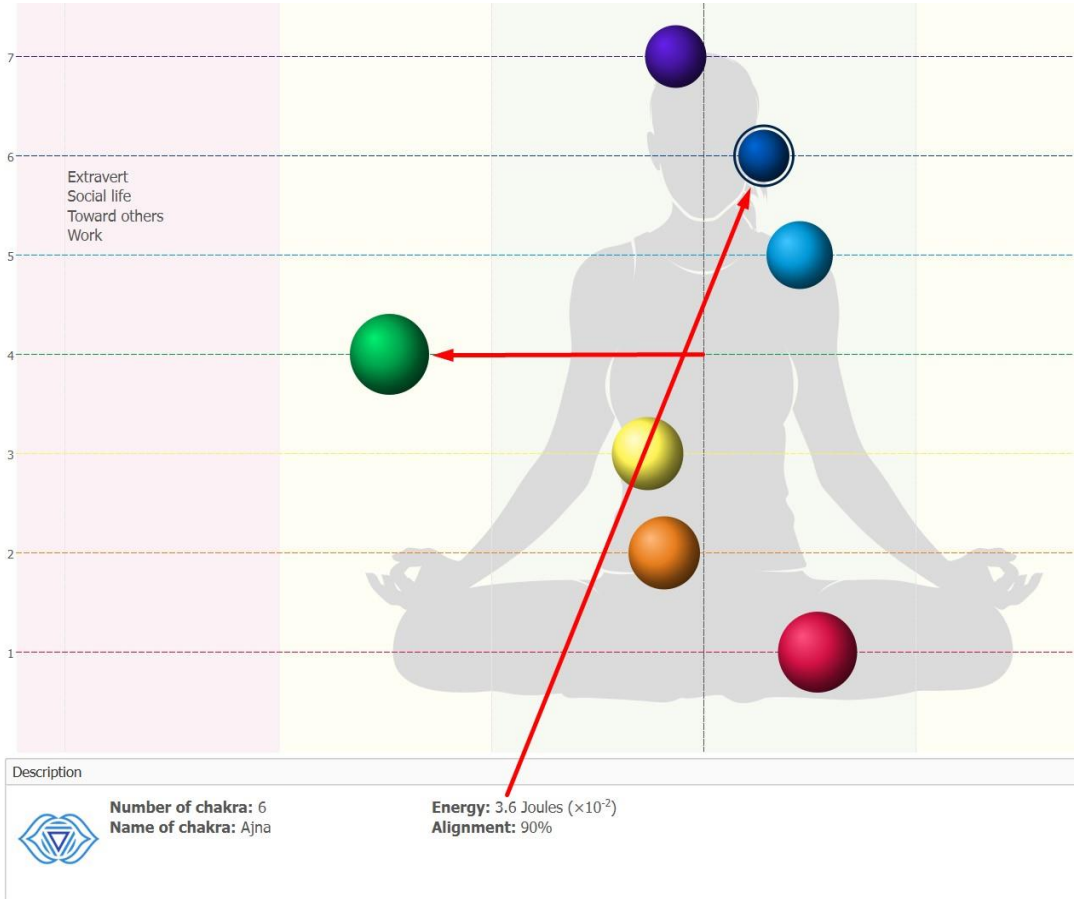
Partial blocking of the function of an organ

Chakras. A brief analysis.

- Energy activity level: less than 4 Joules ($\times 10^{-2}$) - more than 7 Joules ($\times 10^{-2}$)
- Psychological priorities outside the norm.
- Number of chakras outside the norm.
- Tendency to prioritize society or personal interests.
- Signs of chaos or panic.
- Data repeatability.



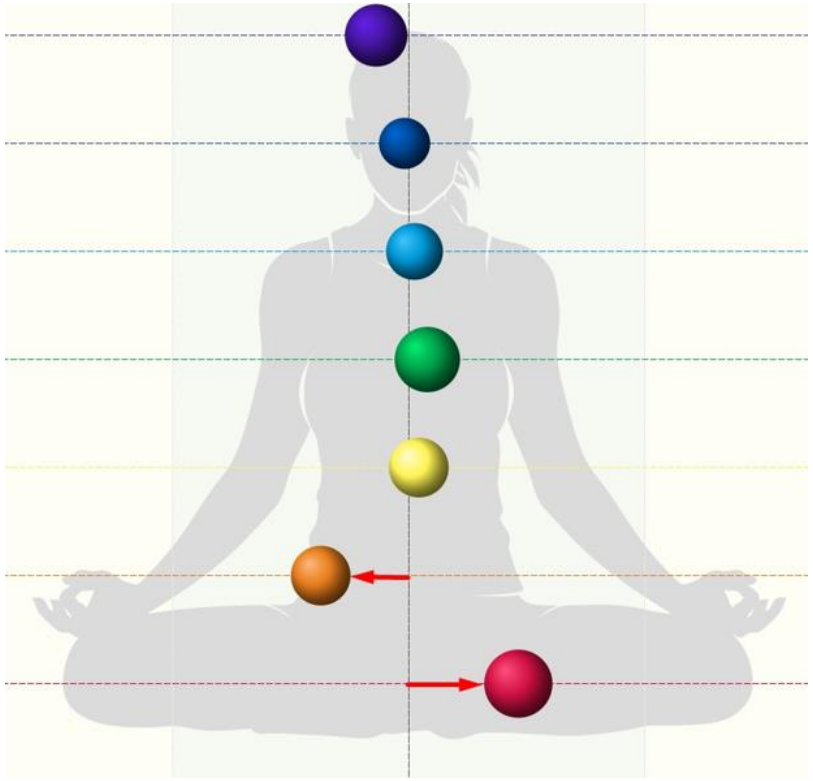
“Chakras.” Significant parameters.

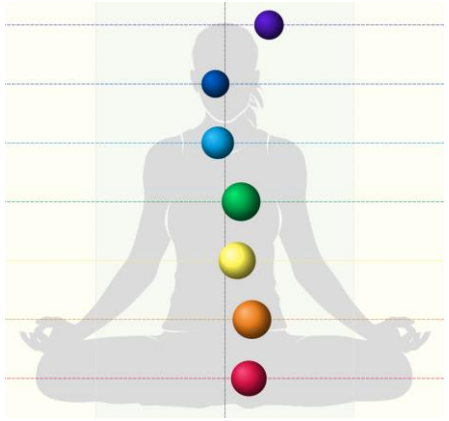


- Energy activity level, Joules (×10-2)
- Alignment — psychological priorities, %.

Psychological priorities.

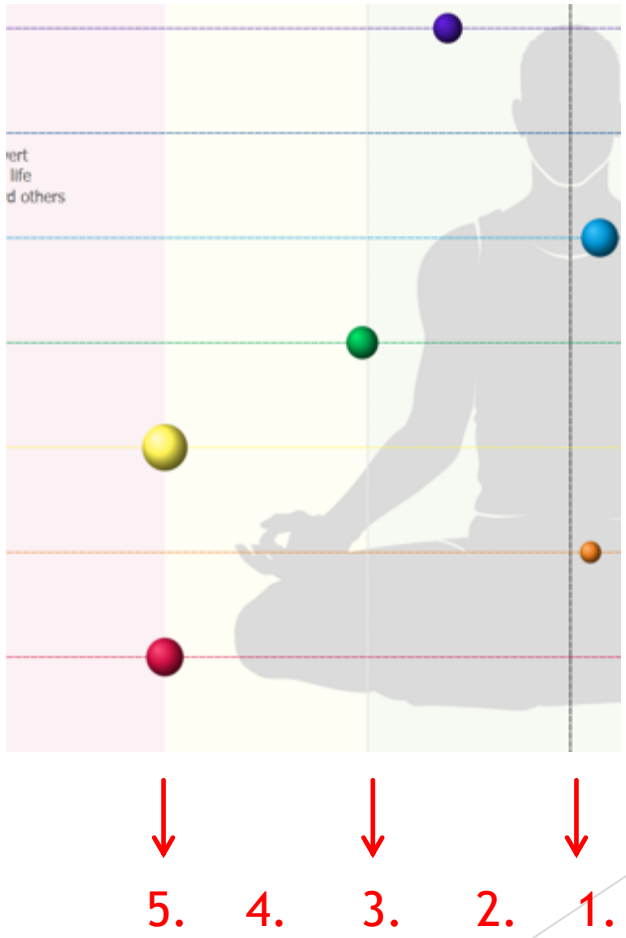
Society **Close circle of acquaintances**



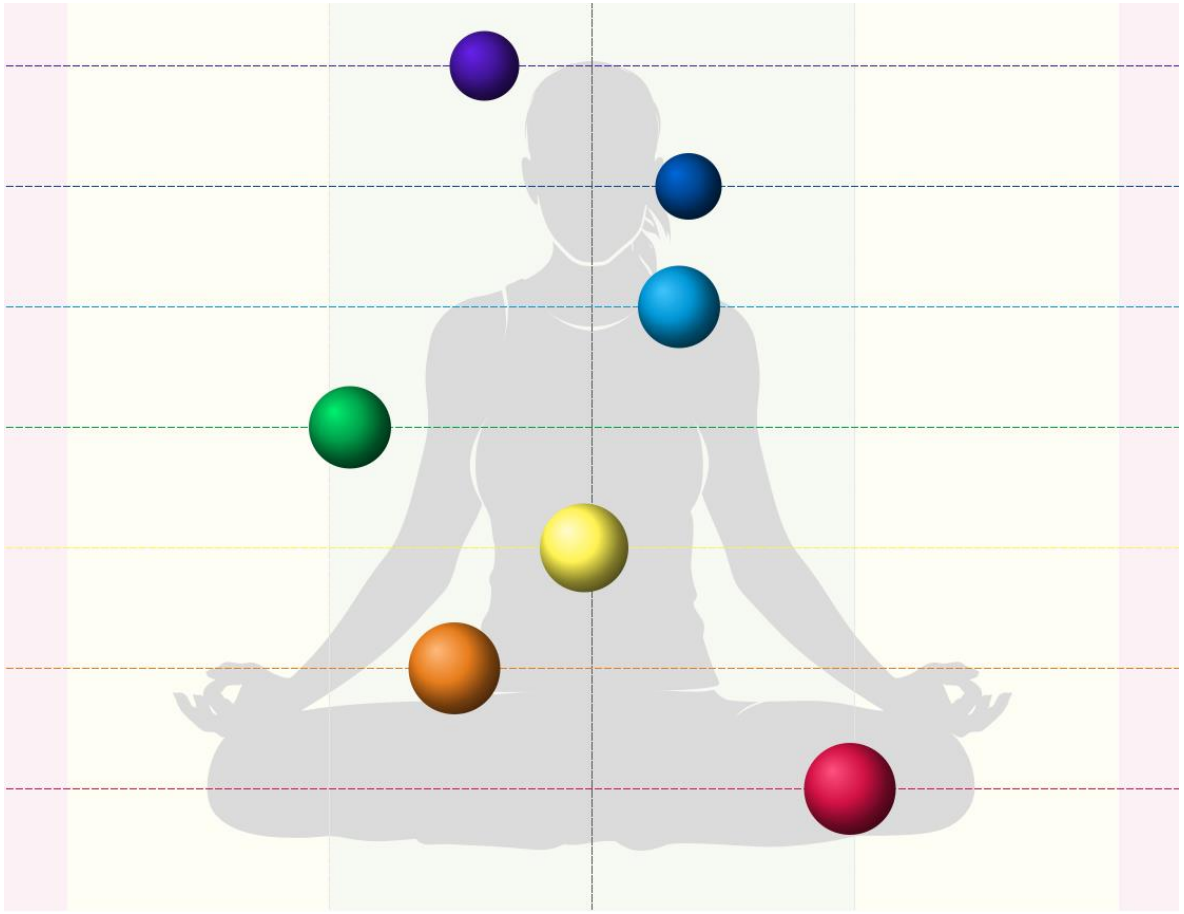


Psychological priorities.

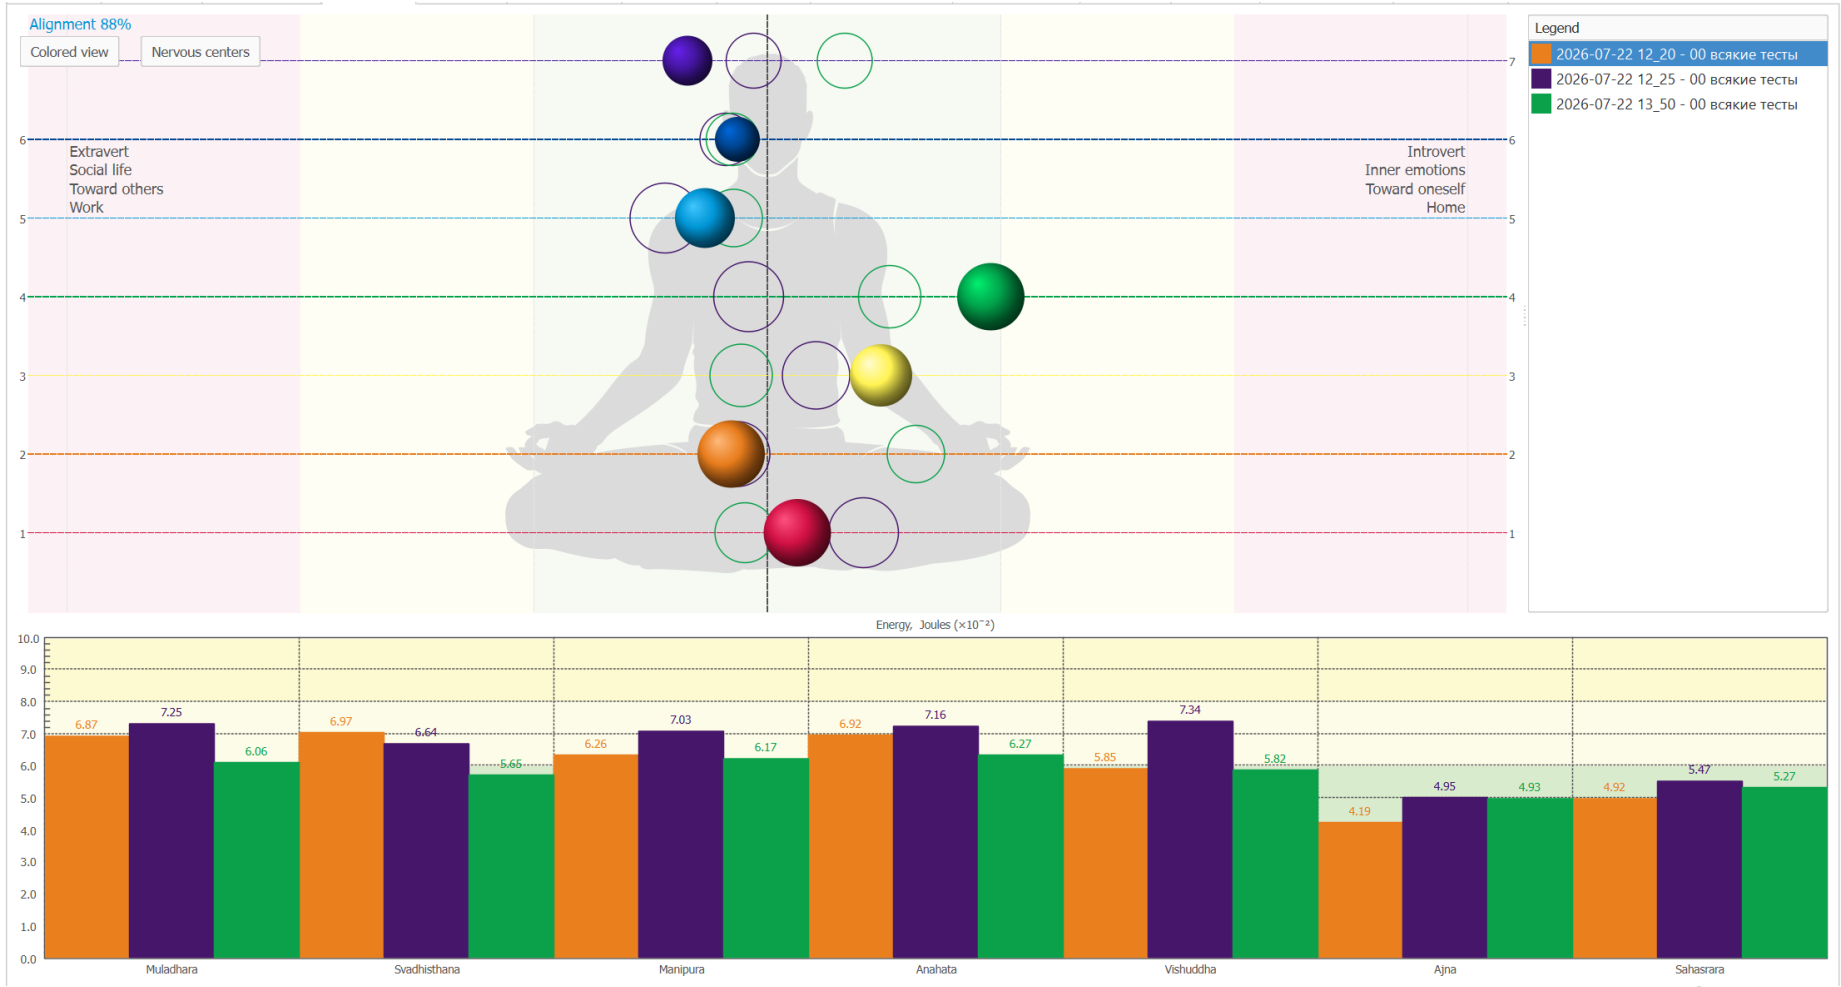
1. The center has no clearly defined priorities;
2. There is a desire or need that can be sacrificed if the goal is difficult to achieve;
3. A very strongly desired goal that forces one to sacrifice other goals. If this goal is abandoned, the person experiences strong regret;
4. A goal that a person practically cannot abandon. Critical thinking does not play a role in deciding whether it is worthwhile to achieve the desired outcome;
5. Fixation on the goal, the inability to distract oneself with other, truly vital matters. A willingness to act to one's own detriment in order to achieve the goal.



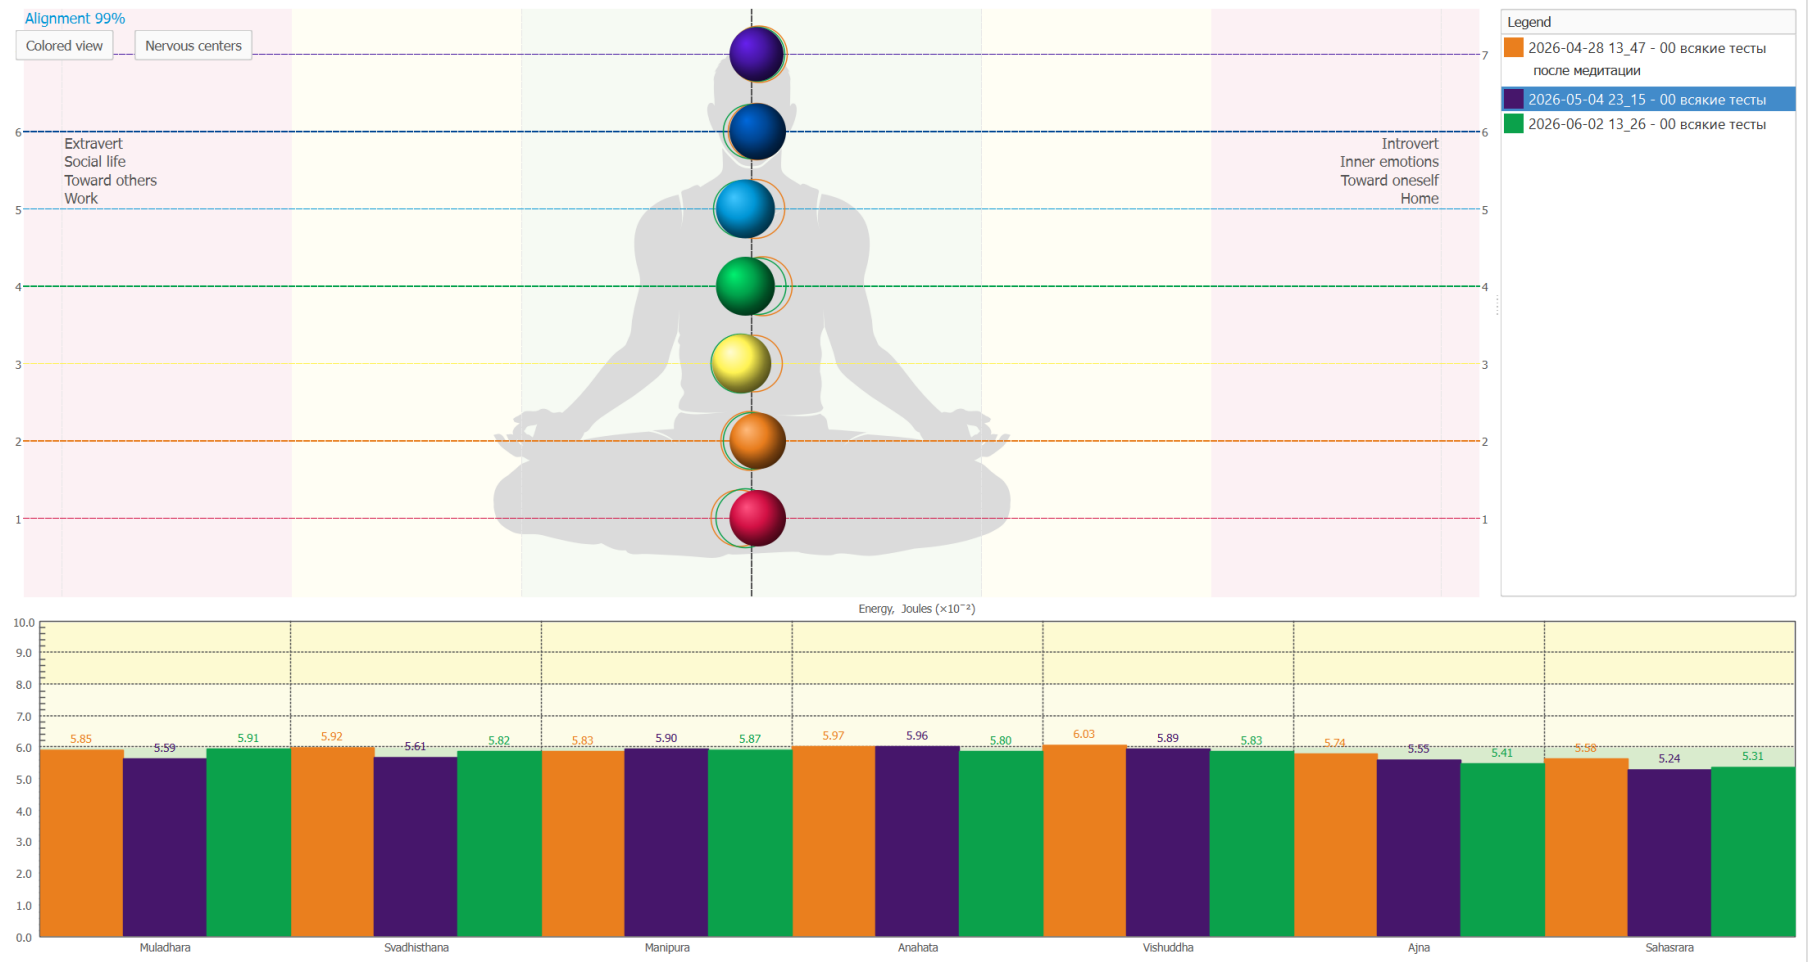
Signs of chaos or panic.



Repeatability of results



Repeatability of results

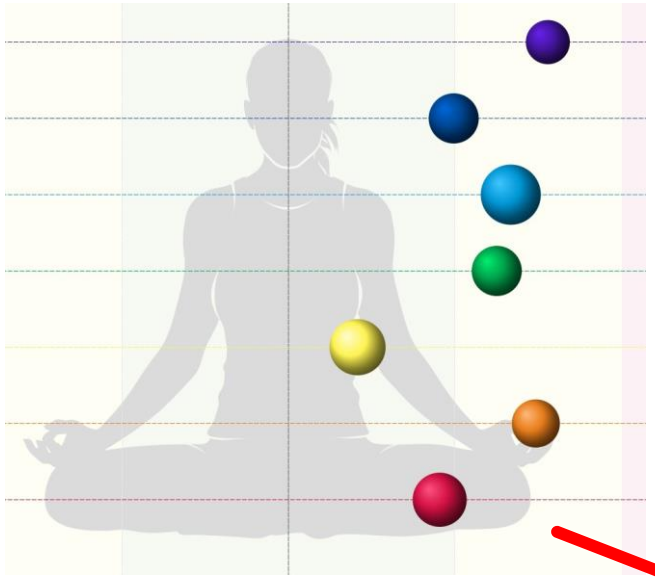


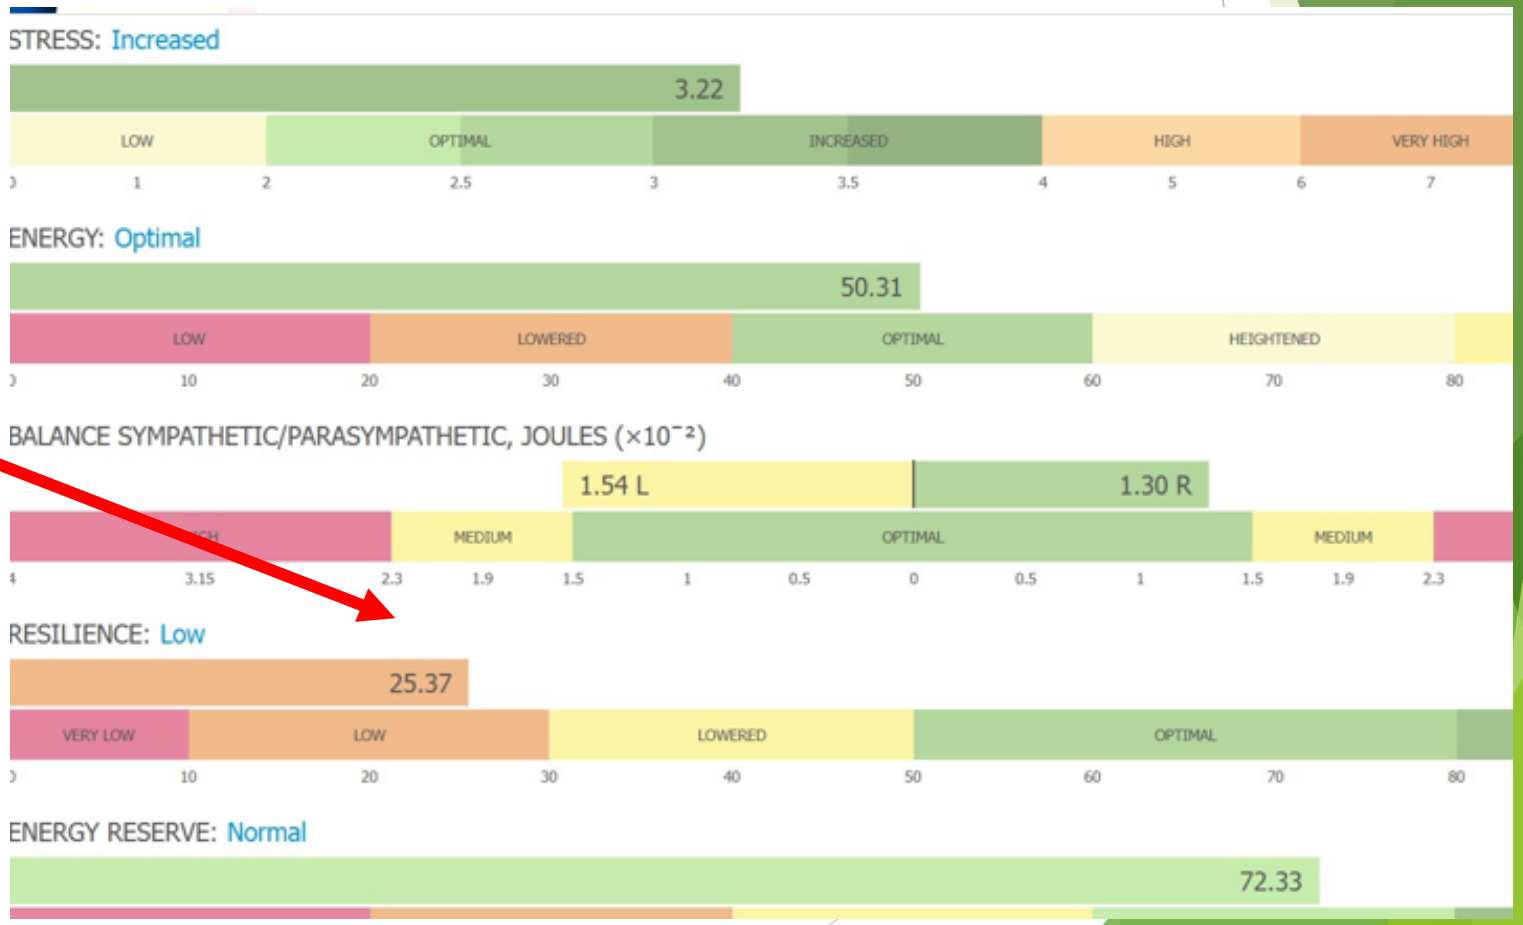
Neurodynamic characteristics

- The level of psychodynamics.
- The level of self-actualization of the individual.
- Stability of social self-perception, the comfort of the social environment.
- Situational control.
- Emotional lability.
- Communication readiness.
- Conscious-subconscious balance.
- The level of intellectual concentration.

It is necessary to add at least three scans in the “Full scan” mode.

The relationship between psychological priorities and the “Resilience” parameter.





THANKS FOR THE ATTENTION!

- Feel like the owners of a unique tool,
- Be aware of your own capabilities,
- Believe in your professionalism, and…

Remember that in difficult situations, you can always turn to the Bio-Well team.☺
